1.	Population, by Industry (major groups) and Age (grouped ages) Census, 30 June 1966	5
2.	Males, by Industry (sub-groups) and Age (grouped ages) Census, 30 June 1966	8
3.	Females, by Industry (sub-groups) and Age (grouped ages) Census, 30 June 1966	11
4.	Persons, by Industry (sub-groups) and Age (grouped ages) Census, 30 June 1966	14
..	List of 1966 Census Publications issued	17

Introduction

Statistics of the characteristics of the population and of dwellings as compiled from Householder's Schedules of the Census of 30 June 1966 are being issued progressively in mimeographed bulletins for each State and Territory.

Each bulletin will be allotted a two-figure code (e.g. 5.4). The first digit identifies the State and Territory concerned and follows the order used in Bureau publications, namely:

- 1 - New South Wales;
- 2 - Victoria;
- 3 - Queensland;
- 4 - South Australia;
- 5 - Western Australia;
- 6 - Tasmania;
- 7 - Northern Territory;
- 8 - Australian Capital Territory; and
- 9 - Australia

The second digit identifies the content of the bulletin, as follows:

1. Summary of population;
2. Summary of dwellings;
3. Ages of the population according to marital status;
4. Ages of the population according to industry;
5. Birthplaces of the overseas born population according to nationality;
6. Occupational status of the population according to industry;
7. Occupational status of the population according to age and marital status;
8. Population and dwellings in local government areas.

A list of the 1966 Census bulletins so far issued is contained on page 17.

Additional bulletins containing further cross-classifications and more detailed geographical data will be issued for Australia as a whole during 1968.

The figures published in this bulletin are final.

All tables in this bulletin exclude particulars of full-blood Aborigines. A statement containing details of the Aboriginal population enumerated at the 1966 Census was issued on 27 November 1967. An analysis is now being carried out of Aborigines at the 1966 Census. At a later date it is proposed to issue the results of this analysis in a publication which will include statistics of characteristics of Aborigines.

Persons having diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are not included.

Any discrepancies between totals and sums of components in percentages in tables are due to rounding.

EXPLANATORY NOTESWork Force

1. At the 1961 and previous Censuses the work force was determined as:
 "Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.)"; and
 "..... those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service"
2. At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.
 "Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER "YES" or "NO".
 "Did the person do any work at all last week for payment or profit? ANSWER "YES" or "NO". Persons working without pay as a helper in a "family business" or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer "YES" to this question. Persons doing only unpaid housework should answer "NO".
 "Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER "YES" or "NO".
 "Did the person look for work last week? ANSWER "YES" or "NO".
 (Note. "Looking for work" means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications)."
3. The work force includes all persons for whom the answer "yes" was given to any one of these four questions. Except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.
4. This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.
5. The net effect of the new definition is to include approximately 8,100 additional persons in the Western Australian work force i.e. a proportionate increase in the Western Australian work force of approximately 2.4 per cent. The major factor in this change was females working part-time (sometimes for only a few hours a week) some of whom, in 1961, did not consider themselves as "..... engaged in an industry, business, profession, trade or service."

Industry

6. Persons in the work force were asked to state industry in accordance with the following instructions.
 "State the exact branch of industry, business or service in which mainly engaged last week, using two or more words where possible. For example, "Dairy Farming", "Coal Mining", "Woollen Mills", "Retail Grocery", "Road Construction", etc.
 Employees should state the industry of their employer. For example, a carpenter employed by a coal mining company should state "Coal Mining". If employed by a Government Department or other public body, state also its name.
 For paid housekeepers and domestic servants in private households, write "P.H."."

7. From the answers to this question, person were classified according to the Bureau's "Classification of Industries" which provides for each person to be classified according to the nature of the business in which mainly engaged, regardless of whether operated by a government authority, corporation or individual.

8. The precise classification of persons in the work force according to occupation and industry is extremely difficult but subject to continuing efforts to improve the quality of the data from census to census. Consequently the comparison of data compiled at the 1966 Census with that obtained at previous censuses is not only influenced by changes in the definition and content of the work force but by the different responses which may have been evoked by efforts to improve the questions on the Census Schedule, and by some changes in coding rules designed to rectify known deficiencies in the data. Classification is difficult mainly because of the problem of conveying through a printed form the exact nature of the information required (e.g. the conceptual difference between 'occupation' and 'industry') and the consequential inadequacy of many replies.

9. It is not intended to revise any of the statistics contained in this bulletin. However, it is proposed to undertake a detailed analysis of the industry information obtained at the 1966 Census to evaluate the precision of the data and as an aid to the framing of classifications and the wording of instructions for the 1971 Census.

10. The information relating to occupations and industries will therefore be subjected to detailed investigation when further tabulations become available. Industry tabulated according to occupation and other characteristics will throw further light on those statistics which prima facie appear to warrant verification. However the information relating to industries in the following tables is published now with the above qualifications in order to obviate the delay which would eventuate if all investigations were to be undertaken prior to publication.

Age

At the 1966 Census persons were asked to state age in accordance with the following instructions.

"State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as "0" years "11" months). If aged under one month, write "0" years "0" months."

This question is more specific than that asked at the 1961 Census, which sought "age last birthday" (in years). The change should overcome some mis-statement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in "months" up to the age of about two years) should now be largely obviated.

Prior to the 1954 Census ages "not stated" were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In the 1954 and later Censuses, "not stated" ages were individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the "not stated" age most probably lay (as indicated by other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. This table had been compiled previously using the latest estimates of the age distribution of the population which were available at the time.

The proportion of persons who failed to state an age is very small.

TABLE 1. - POPULATION, BY INDUSTRY (MAJOR GROUPS) AND AGE (GROUPED AGES) : WESTERN AUSTRALIA

CENSUS, 30 JUNE 1966
